The 7th Advanced Functional Materials and Devices

The 7th Advanced Functional Materials and Devices (AFMD) will be held in Havana, Cuba during December 18-23, 2017.

The AFMD offers most advanced scientific achievements and at the same time covers state-of-the-art developments in the materials level as well as in the system level. The conference will provide a unique and golden opportunity for scientists to exchange their excellences, achievements through the platform of AFMD.

Publication

Full papers can be submitted to the special issue of Advanced Functional Materials and Devices of journal of Functional Materials Letters for consideration of publication. Full paper submission will start from 1st Nov 2017 and close on 31st Jan 2018. Selected papers after peer review will be published in Functional Materials Letters.

Submission Way

1. Full Paper (Presentation and Publication)

It will be invited to give the oral presentation at the conference and be published in the conference proceedings.

2. Abstract (Presentation only)

It will be invited to give the presentation at the conference, the presentation will not be published.

Schedule

December 18th, 2017 Conference Kits Collection

December 19th-22nd, 2017 Conference Event

December 23rd, 2017 Technical tour

MS. ECHO J. NIE
Conference Secretary of AFMD
E-mail: afmd@zhconf.ac.cn
Tel: +86-28-83533337

Abstract Submission Deadline

September 30th, 2017

Notification Date

October 20th, 2017

Registration Deadline

November 10th, 2017

Conference Dates

December 18-23, 2017

About Havana

Havana is the capital city, largest city, province, major port, and leading commercial centre of Cuba. The city proper has a population of 2.1 million inhabitants, and it spans a total of 728.26 km² (281.18 sq mi) – making it the largest city by area, the most populous city, and the third largest metropolitan area in the Caribbean region. The city extends mostly westward and southward from the bay, which is entered through a narrow inlet and which divides into three main harbours: Marimelena, Guanabacoa and Atarés. The sluggish Almendares River traverses the city from south to north, entering the Straits of Florida a few miles west of the bay.
